

B2B EIN VERIFICATION API

Access via high speed API or File License

We invite you to partner with us to access the most complete USA EIN Tax ID business database available. Our Unique **EIN database** is unlike anything available elsewhere. and more for the nations major businesses, mid-sized businesses and even small businesses.

With REALSEARCH EIN-API, unnecessary labor costs are eliminated, as searches can be completely automated to provide efficient data retrieval. REALSEARCH_EIN-API can also eliminate the need for a large capital investment. It offers the same flexibility and conveniences as an in-house database without the costs associated with additional computer hardware, data acquisition, development and maintenance. API allows software makers to extend the functionality of their software application.

- **Business Data for research** — License our entire database or customize a data subset for your specific requirement.
- **Reduce fraud and risk**— Know your customers more than just their contact info, background, civil and federal bankruptcy data and much more instantly.
- **Know Your Clients** — enter info about your client and pull extensive business, and officer details within moments.
- **Build Better Business relationships** —Armed with this data you can discern the best approach and direction for business opportunities.
- **Coming Soon "Credit Reports"** — Complete Business data will be added to easy to read Credit reports seamlessly integrated with all business contact and background details.
- **Save Time** — Ready made easy API plugins, or easy to access manual lookup access.

Because our API is based on Web services architecture, we are cross-platform compatible. Our objects, features and functions can be added into any software, regardless of whether that software is coded in Java, C++, and PHP, ASP.NET or any other language! Due to the expanding prevalence of Web service support, our objects are easily inserted into your software using standard IDEs for easy dissemination of the available functions.

- o Total interface control.
- o Flexible, customizable search capability.
- o Volume pricing.
- o XML Based non-soap API.

B2B EIN VERIFICATION API

EIN Verification API allows you access to millions of EINs

Sources Information within this multi-purpose Business Megafire is updated quarterly from various sources , federal and state sources, public records,. Realsearch.com is the nation’s premier source of EIN s information and background facts and assessment on the companies that are important to your clients. Business information from Realsearch.com will allow you to establish and build considerably more profitable business relationships with your customers, prospects, and suppliers — nationwide.

SearchByEIN This call searches for the EIN Number in the database. It performs an exact match of the EIN.

SearchByPhone This call searches for the Phone Number in the database. It performs an exact match of the Phone number.

SearchByCompany This call searches for the Company name in the database. You can also optionally provide a state name and/or a zip code to limit the search only to that particular state or zip code. The API performs an exact match of both the state name and the zip code.

Search Types:

This call provides two types of searches:

1. STARTS_WITH
2. CONTAINS

In case of STARTS_WITH, the search string is matched at the beginning of each company name. Whereas in case of CONTAINS, the search string is matched anywhere in the company name.

CountByCompany This call is similar to SearchByCompany but it only returns the number of matched records. This call searches for the Company name in the database. You can also optionally provide a state name and/or a zip code to limit the search only to that particular state or zip code. The API performs an exact match of both the state name and the zip code.

Search Types:

This call provides two types of searches:

1. STARTS_WITH
2. CONTAINS

In case of STARTS_WITH, the search string is matched at the beginning of each company name. Where-
